## DETAILED ACTION

### *Allowable Subject Matter*

1. **Claims 1-20** are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claims 1 and 9: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a coupler or method of forming a coupler comprising a bundle of a plurality of multimode fibers (defined by applicant as fibers with a core mode field diameter above 50  $\mu\text{m}$ ) having a few-mode fiber (defined by applicant as fibers with a mode field diameter of 30 to 50  $\mu\text{m}$ ) as the fiber that transmits an optical signal, a large area core double clad fiber (LACDCF) (defined by applicant as having a mode field diameter similar to the core of a few-mode fiber) having an inner cladding and outer cladding with a lower refractive index and having an end terminating with the input end of the inner cladding into which the signal is transmitted from the few-mode fiber to the input end of the LACDCF, the bundle also having a fused end portion with an output end having a periphery that fits within the circumference of the inner cladding of the input end of the LACDCF and the output end of the bundle is aligned and spliced with the input end of the LACDCF to preserve fundamental mode transmission from the few-mode fiber to the LACDCF, in combination with the rest of the claimed limitations.

With regard to claims 2-8 and 10-20: These claims are allowable over the prior art of record because they depend from allowable claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
